

# Read Me

## Doctor-Patient Portal

Welcome to our Doctor-Patient Portal! This platform is a convenient space for doctors and patients to manage appointments and health-related information.

To access the portal use <http://project-prod-new.us-east-1.elasticbeanstalk.com/Login.aspx> and choose one of the following login options:

- Admin: {USERNAME = PASSWORD = Admin}. Can add new doctors and manage.
- Doctor: Can manage appointments. {USERNAME = PASSWORD = doctor}
- Patient: Can be registered and book an appointment and also receive the confirmation via mail. {USERNAME = PASSWORD = sample}

## Patient Registration

Patients can register to gain access to the portal. Upon registration approval, patients can log in and perform various actions, including:

- **Booking Appointments**: Patients can schedule appointments with their doctors through the portal.
- **Viewing Appointment History**: Access past and upcoming appointment details.

## Doctor and Admin Access:

Doctors and administrators have separate login credentials and access levels within the portal.

- **Doctors**: Can view scheduled appointments, access patient medical records, and manage their availability.
- **Admins**: Have administrative privileges, including user management, system configuration, and overseeing the portal's functionality.

## How to Use

- **Login**: Select your role (admin, doctor, or patient) from the login options provided on the opening page.
- **Register (Patients Only)**: If you're a patient, register to create an account.
- **Dashboard**: Once logged in, access your dashboard to perform the respective actions based on your role.
